

TO SCAN NEW FREEVIEW CHANNELS ON SATMAX PLUS RECIVIER V1

Press Menu Button on Remote Control
Using arrow buttons ,
Highlight Installation on menu , then press OK

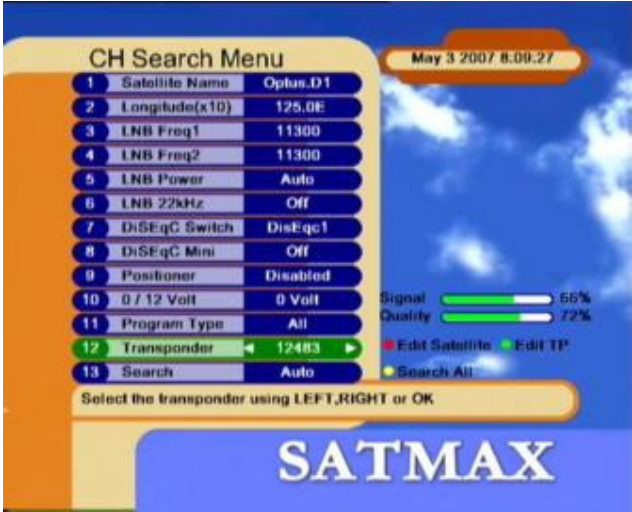

If Required -Enter password , Default is Either 0000 or 5565

Then You Should Get The Following Screen

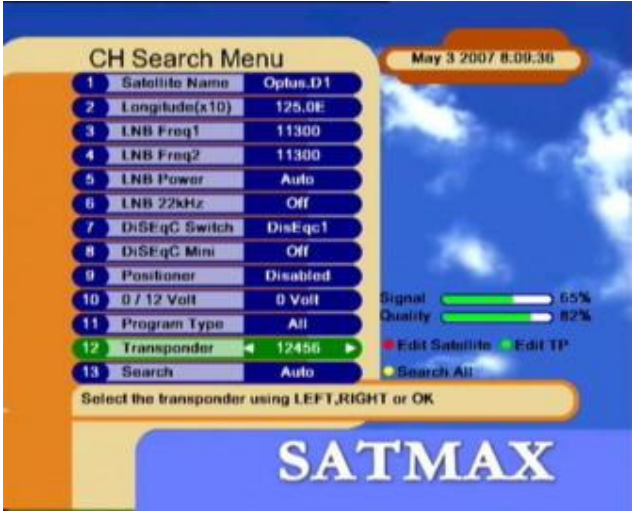

Use Your VOL buttons (Left & Right) to highlight and find OPTUS D1 or OPTUS B1 Satellite in the list. (they are the same for this purpose)

Now: Refer to picture Below.. You should move the highlight bar down to the Transponder (12) option

Move left or Right until you get < 12456 >

As below

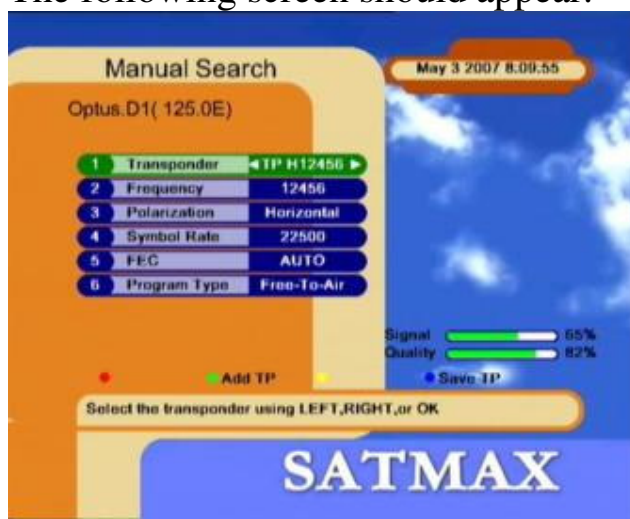

Then Press **GREEN** Button on remote for edit screen

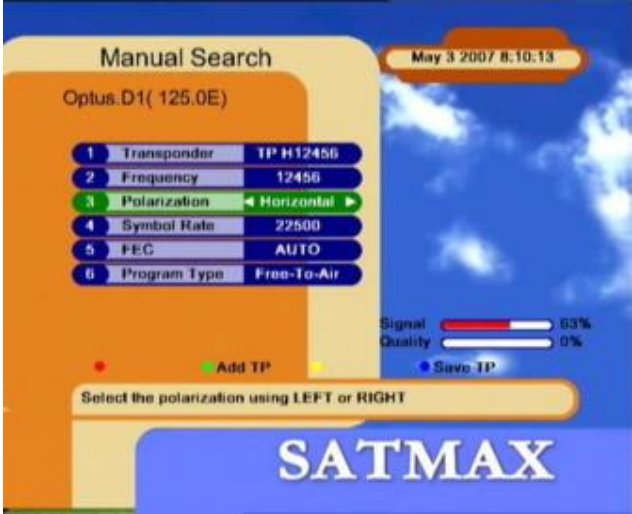

Now Press **RED** Button (not the power button!!! The other red one)

The following screen should appear.

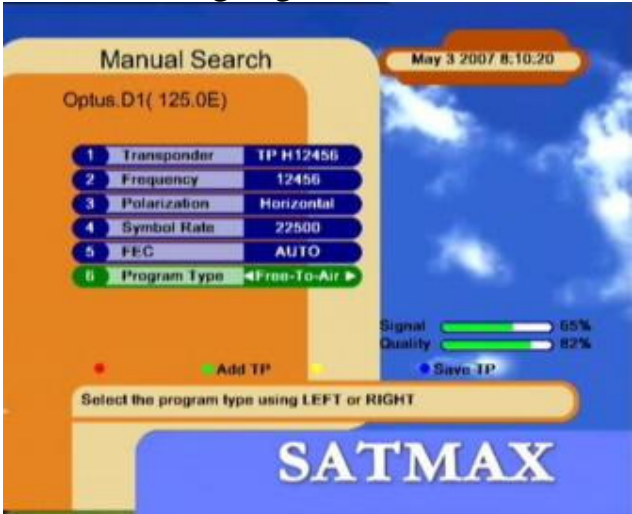

Now Check the following settings are correct

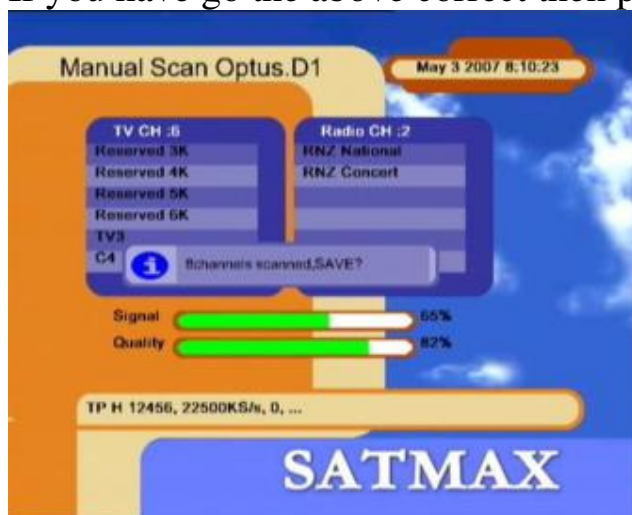

Make sure Polarization should be HORIZONTAL
If not then highlight and use LEFT & RIGHT to Change.

Now Check (6) Program Type is Free To Air
If not then highlight and use LEFT & RIGHT to Change.

If you have go the above correct then press OK on remote

Channels should scan into place ,
After press OK to store,

Then Exit a couple of times to Exit.

You Should Be Done...

If you need to move and sort channels please down load our instructions on how to do this.
